

**Company:** KBRwyle

**Company Description:** KBRwyle is an integrated provider of full spectrum program life cycle services to the U.S. federal government. KBRwyle is comprised of 10,500 dedicated employees who help customers achieve mission success on many of the government's largest and most important programs. KBRwyle is the #1 maintenance provider of prepositioned stock for the U.S. Army and U.S. Marine Corps, the #1 Systems Engineering and Technical Assistance (SETA) provider to the U.S. Naval Aviation and U.S. Army Aviation and the #1 life sciences provider to NASA. The organization is also a leading provider of expeditionary support services and mission operations – often in the world's most challenging environments. KBRwyle core capabilities include operations, engineering, logistics, science, program and acquisition management, and information technology/cyber security services. KBRwyle is part of KBR, Inc., a publicly traded company on the NYSE (NYSE: KBR).

**Position Description:** Quality Engineer

As a Quality Engineer for KBRwyle, you will be required to work directly with suppliers to satisfy Honeywell's quality standards and strategy in the manufacture of aerospace and engine components. As a field quality representative, you will be required to interact with all levels of supplier management.

Organizationally, you will report directly to the Manager, Field Quality Engineers. You will be expected to travel in support of a variety of supplier oversight functions, spending a majority of your time at supplier facilities. As Honeywell's point of contact within the supply base in direct support of OEM site requirements, you will:

- Provide technical leadership to coordinate implementation of advanced quality processes including statistically based variation reduction, control planning, mistake proofing, and Manufacturing Process Control
- Evaluate prospective supplier Quality Systems and conduct Gap Analysis where required
- Evaluate procedures for compliance to contractual and regulatory requirements (including international regulation coordination issues)
- Prepare and present metrics associated with quality trends and related improvements within the supply base. Prepare progress reports, program reviews as needed, to assure the highest quality and cost effectiveness from the suppliers
- Train associates, suppliers, and contract personnel in Six Sigma techniques, Manufacturing Process Control, variation reduction, etc.

**Success Factors:**

You will be responsible for quality assurance processes including, but not limited to, First Article Inspection Requirements (FAIR), Self Release and product audits, as well as coordination of Quality System (AS 9100) compliance audits and special process oversight.

In addition, you will be responsible for training and deployment of Manufacturing Process Control, variation reduction, quality requirement compliance, Six Sigma, and other Honeywell sponsored supplier initiatives.

Primary tasks include but are not limited to the following:

- Deliver projects on time, specifications and budgets, coordinate cross-functional project teams through the whole project cycle. Lead and coordinate project meetings and reviews.
- Create and execute project work plans and revise as appropriate to meet changing needs and requirements.
- Manage and maintain effective communication with all internal and external partners, such as suppliers, sales managers and customers as well as members of the management team.
- Manage day-to-day operational aspects of projects and scope.

**Requirements:** US Citizen, Bachelor's Degree w/ Technical or business experience from the military or civilian sector, Experience in leading teams, Solid communication skills, High level of analytical ability to identify and evaluate appropriate courses of action and processes for key resolution of complex problems.

**Location:** Redmond, WA

**Salary:** ~\$68k/yr DOE

**Benefits:** 401k, Paid vacation and holidays, Comprehensive Medical, Dental, and Vision, Wellness Programs, Short and Long Term Disability Insurance, Flexible Spending Accounts, Tuition Reimbursement Program, Employee Assistance Program
